DPS
IT FOR FINANCE
AND RETAIL

We are DPS Group, the German market leader for self-service solutions within the financial sector (approximately 60.000 devices). We help to make sure that your bank transfers and financial assets will be processed securely. We enable and support our customers in aligning digitalisation and bank IT by providing solutions, application management and consulting services at the heart and interface of technology, regulatory compliance and transaction banking.

At DPS Innovations, a research-based corporate unit established at the end of 2016, we are designing and developing new FinTech/RegTech business models, applications and platforms, particularly focusing on sustainable use cases for Blockchain and Distributed Ledger Technologies as well as future IoT payment solutions.

Join the DPS Innovations team at our **Berlin** office as a

Web Application Developer (f/m/d)

YOU WILL …

▶ Be responsible for developing PoCs, MVPs as well as enterprise-grade web applications, focusing on frontend design and development

▶ Be part of a cross-functional team working closely with both software architects and software engineers

▶ Collaborate with business development, product management and our partners/customers

▶ Design and create responsive (mobile first) user interfaces based on proven (UI/UX) design patterns and a state-of-the-art technology stack

▶ Ensure highest quality of code and software by supplementing tests and implementing latest security standards

▶ Help maintaining and continually improving the delivered product, software and/or artifacts.

YOUR SKILLS …

▶ You have a master's degree in a computer/IT related field or several years of experience in Web Application Development

▶ You have a profound knowledge in working with HTML5/CSS, JavaScript and TypeScript (other languages are a plus)

▶ You have a solid understanding and practice with the Angular 5+ SPA framework (other frameworks are a plus)

▶ You have experience in creating and consuming RESTful APIs/web services as well as handling common (web) authentication methods

▶ You enjoy working on innovative and agile software development projects (including DevOps processes and tools)

▶ You have great team spirit and excellent communication skills (in German/English)

▶ You are passionate about solving problems and implementing practical solutions in a fast-paced and highly dynamic work environment

WE OFFER …

▶ A flat organizational structure and an open door policy

▶ A creative and collaborative work environment as well as an open-minded company culture

▶ A network with partners from both industry and university/research

▶ A competitive salary and individual career opportunities

Are you as curious to get to know us as we are to get to know you? We are looking forward to receiving your application by e-mail: **bewerbung@dps.de**
